

Mahmoud Shawa

mahmoud@shawa.dev | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Fullstack/Product Engineer with 0→1 startup experience and recent work building AI-assisted research tools at Nexxt Intelligence. Strongest in TypeScript, React, Python, AWS, and Terraform, with a focus on complex product interfaces, Human-in-the-Loop workflows, and shipping polished user-facing features. 2x Founding Engineer with acquisition experience.

Skills

Core: TypeScript | Python | React | Fast API | Next.js | React Native | PostgreSQL, AWS, Terraform

Frontend/Product: Tailwind | Framer Motion | Figma implementation | Accessibility | Responsive UI

Specialties: Product engineering | AI-assisted workflows | Human-in-the-Loop interfaces | Startup MVPs

Experience

Nexxt Intelligence — Toronto, ON | Fullstack Engineer | [Website](#) | 01/2025 - present

- Built major parts of AI Coding v2 / SmartCoding, a Human-in-the-Loop application that helps researchers generate, edit, and refine codeframes with AI.
- Engineered SmartProbe Studio, a researcher-facing AI configuration interface for simulating and tuning probing behavior in conversational studies.
- Developed React + TypeScript workflows for interactive chat simulations, agent settings, and complex user inputs; contributed to Python/TypeScript backend services and Terraform-managed AWS infrastructure.

Callmi Inc — Dubai, UAE | Founding Engineer, **acquired by Brinc** | 10/2023 - 12/2024

- Built the core Next.js application using the App Router, server-side rendering, and caching strategies to support a marketplace for expert video consultations.
- Designed and implemented the PostgreSQL/Prisma data model and API layer for booking, profiles, authentication, and payment workflows.
- Helped maintain a clean, production-ready codebase through acquisition diligence and post-acquisition transition planning.
- Stayed on post-acquisition in a technical advisory capacity, supporting architecture decisions and feature feasibility.

Goodable — Toronto, ON | Lead Developer (Contract) | [Website](#) | [App](#) | 06/2024 - 11/2024

- Built and shipped a large React Native frontend redesign across the Goodable iOS/Android app, adding new user-facing features within an inherited codebase.
- Implemented Figma-driven mobile UI flows with attention to consistency, accessibility, and responsiveness across devices.

Bountree Inc — Dubai, UAE | Founding Engineer | 03/2023 - 07/2023

- Delivered a production-ready MVP in under 2 months, helping secure \$60,000 in beta contracts.
- Designed a serverless-first architecture on Vercel with Node.js, achieving a scale-to-zero cost model while supporting beta launch traffic.

General Assembly — Toronto, ON | Instructional Associate | [Profile](#) | 02/2022 - 03/2023

- Supported software engineering students across JavaScript, React, Node.js, Python, Django, MongoDB, and APIs; maintaining a 4.8/5 average feedback rating.

Education

General Assembly — Certificate, Software Engineering | 10/2021 - 02/2022

Western University — BA, Economics (incomplete) | 9/2015 - 1/2018

Fanshawe College — Diploma, Accounting | 09/2013 - 04/2015
